

# Course Organization Strategies

## Logical Progression

Structure lessons as sequential steps, each building on the previous, to develop skills or knowledge systematically.

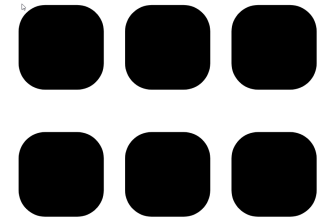

## Narrative Flow (Storyline)

Arrange lessons to follow a storyline, creating an engaging and memorable learning journey.

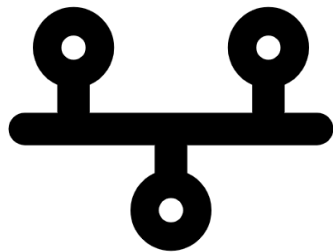

## Modular Design

Structure lessons so that each one introduces a foundational concept or skill, with subsequent lessons adding complexity or depth.

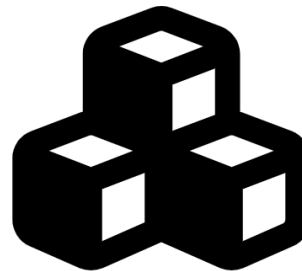

## Chronological Ordering

For subjects that benefit from a historical perspective, lessons can be organized chronologically.

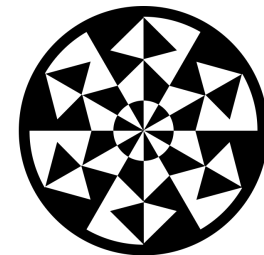

## Building Block Approach

Structure lessons so that each one introduces a foundational concept or skill, with subsequent lessons adding complexity or depth.

## Kaleidoscopic View

Offer lessons as standalone views or insights into the topic, allowing for flexibility in the order of learning.
